CODE COMBAT

Description :

Code Combat is a 1 vs 1 competitive coding duel where each participant is paired with another participant. Both competitors receive the same LeetCode-style coding question, and their goal is to solve it as fast as possible.

Rules :

- Each participant will be paired with another participant (1v1).
- Both competitors receive the same LeetCode-style question at the same time.
- If the number of participants is odd, one participant may receive a bye to the next round.
- If both participants submit incorrect solutions:
- The one with the closest working logic or fewer errors may advance.
- If neither solves the problem:
- A tie-breaker question will be given
- Use of AI and internet is strictly prohibited

CODE CRAFT

Description :

Code Craft challenges participants with a series of coding problems that include special constraints such as restricted time, limited memory, specific algorithmic approaches, or mandatory optimization techniques. This event focuses on a developer's ability to craft efficient solutions while respecting limitations, pushing them to apply data structures and algorithms intelligently.

Rules :

- Can be solo or duo
- Problems must be solved strictly following the constraints provided.
- Penalties for brute-force solutions if they violate constraints.
- Participants may use any preferred programming language unless stated otherwise.

27th January
10AM onwards

Fee
₹100

CODE QUEST

Description :

It is a multi-stage event that examines a broad spectrum of coding abilities.

- Round 1 – Debugging: Participants fix buggy code segments in minimal time.
- Round 2 – LeetCode Round: A set of DSA challenges must be solved under strict time limits.
- Round 3 – Buzzer Round: A competitive quiz where participants must answer conceptual or output-based questions faster than their peers.

Rules :

- All three rounds are elimination-based.
- Buzzer round rewards fast and correct answers—negative marking may apply.
- Internet use strictly prohibited except for provided platforms.
- Judge's decisions are final.
- You may not rewrite the entire code unless the bug requires restructuring.
- Output must match the sample test cases exactly.

CODE SPRINT

Description :

Code Sprint is an exciting and fast-paced coding event where teams work together to come up with creative solutions to real-world problems in just 4 hours. It's all about teamwork, technical skills, and innovation. Participants get to build working prototypes, show off their talents, and compete for cool prizes.

Format :

- Team Formation
- Development Phase
- Presentation Phase

Rules :

- Teams must consist of 2-4 members.
- All work must be completed during the hackathon duration.
- Use of open-source libraries and pre-existing code is allowed, but plagiarism will lead to disqualification.
- Teams must submit their projects before the deadline to be eligible for evaluation.
- Teams must clearly understand and be able to explain any AI-generated or online-sourced code used in their project.

26th January
10AM onwards

CIRCUIT CRAFT

Description :

Circuit Craft is a dual-stage competition designed to test both your digital design skills and physical hardware proficiency. Participants will first prove their efficiency in software simulation before moving on to the hands-on art of PCB fabrication. From optimizing component placement to mastering the chemical etching process, this event challenges you to create circuits that are not only functional but also compact and professionally executed.

Rules :

Round 1: Digital Design (Software)

- Participants must use KiCad for this round.
- Teams receive random components and must design a functional circuit using them.
- Create a valid schematic and PCB layout using only the given components.

Round 2: PCB Fabrication (Etching Round)

- All qualified teams receive a common standardized circuit design.
- Maximum 2 tries (two copper boards).
- Gloves and masks must be worn during all chemical etching steps.

26th January
1 PM onwards

TECH MYSTERY BOX

Description :

Tech Mystery Box is a fast-paced challenge where each team receives a sealed box of random hardware components.
The twist is that participants don't know what components they will get.
Using only the items inside the box, teams must build a functioning device, solve a specific challenge, or create a circuit that meets a given task.

Rules :

- Only components from the mystery box may be used.
- No external hardware unless organizers permit.
- Teams are judged on:
- Working result
  - Innovation
  - Design approach
  - Explanation of the logic
- Time-bound event — no extra time will be provided.
- All components must be returned after the event.

HARDWARE HUSTLE

Description :

Hardware Hustle is an intense 3-hour hardware hackathon where teams are given access to a full table of components Based on a theme or problem statement revealed at the start, participants must design and prototype a fully working hardware solution within the time limit.

Rules :

- All building, coding, and prototyping must be done during the event.
- Pre-built full projects are not allowed; partial modules are allowed only if assembled during the event.
- Teams must submit:
  - Circuit diagram
  - Code
  - Working prototype demonstration
- Participants must follow safety rules while handling tools and electronics.

GYRO QUEST

Description :

Gyro Quest is a robotics event where participants must build a self-balancing 2-wheeler robot
Teams must design, assemble, program, and tune their robot so that it can stand, move, and maintain balance without falling.

Rules :

- Teams may build their robot using any components unless restrictions are given.
- The robot must be a two-wheeled self-balancing model.
- Judging is based on:

1. Stability
2. Balance duration
3. Control smoothness

- Damaging the arena, equipment, or other robots leads to penalties.
- All teams must explain their working, including:

1. Sensors used
2. Mechanical design

- AI or internet usage is allowed for reference before starting of event

VALORANT

Description :

Will be held in project lab, a shooter game consisting of 2 teams of 5 where one team attacks and other defends and vice versa. Maps will be selected through elimination process. First round will be swift play and next round onwards will be competitive.

Rules :

- Entire event will be for a span of 3 days.
- Should be present on allotted time if not then disqualified
- No fighting with other teams or admins or hods.
- Esp and hacks not allowed if found then disqualified.
- Can bring their own mouse, keyboard, headphones.
- Matches will be conducted via brackets.
- If any equipment provided by the college is found to be missing or stolen by a team, that team will be disqualified or penalized.
- Looking at opponents screen will lead to disqualification of the whole team.

BGMI - SQUAD

Description :

Will be held in seminar hall, shooter game consisting of multiple teams where each team consists maximum of 4 players who fight to secure the winner winner chicken dinner(1st place).

Rules :

- The first round will be qualification round and the second one will be the final round.
- Entire event will be of 1 day.
- Updates regarding matches will be updated via WhatsApp
- First round will be of 2 matches and second round will be of 4 matches.
- Should be present on allotted time if not then disqualified.
- No fighting with other teams or admins or hods.
- Esp and hacks not allowed if found then disqualified.
- Can bring their own adapters.
- If any equipment provided by the college is found to be missing or stolen by a team, that team will be disqualified or penalized.

CHECKMATE MASTER

Description :

Challenge yourself against the best strategists in the region. Whether you are a chess grandmaster in the making or a casual enthusiast, prepare to showcase your intellect and mastery over the 64 squares.

Rules :

- System: The event will be conducted using a 10-round Swiss system format.
- Time Control: Each game will be played with a time control of 3 minutes plus a 2-second increment per move.
- Scoring: Results will be scored as 1 point for a win, 0.5 for a draw, and 0 points for a loss.
- Pairings: All pairings will be generated by the tournament software, and its decisions are final and non-negotiable
- Game End: Occurs via Checkmate, Resignation, Time-out (flag fall), or Arbiter decision (rule violation).
- Resolution: Placements for equal points decided by standard Swiss tie-breaks (via software).

PAPER PRESENTATION

Description :

Participants must present a research paper or technical article on any approved domain.
They must clearly explain:

- The problem statement
- Methodology
- Experiments or analysis
- Results and findings
- Innovation and contribution

Rules :

- Papers must be original and non-plagiarized.
- Presentation time: 8–12 minutes + 2–3 minutes Q&A.
- Slides must be:

1. Clear
2. Technically accurate
3. Well-structured

- Participants must submit their paper and slides before the event deadline.

TECH DECK

Description :

Tech Deck is a unique 3-part event where participants must complete ALL THREE Levels to finish the event:
Level 1:Teams receive a set of cards containing location-based puzzles and technical quizzes to reach the designated zone and unlock the Level 2 Card.
Level 2: Component Challenge Using the component list from the card, teams play a Ping-Pong Cup game. Landing the ball in the correct cup earns the specific hardware components needed.
Level 3: Human Circuit & Build Teams must form a life-size "Human Circuit" (Twister-style) using their bodies as connections. Completing this unlocks the Reference Photo, which teams use to build the final hardware/software project.
Final Presentation-Teams present their build for 3–5 minutes. Judging is based on accuracy, creativity, and functionality.

Rules :

- Only components earned during the Ping Pong selection stage can be used.
- The human circuit must match the final circuit logic.
- The final circuit must be fully functional to qualify.
- No external components or hidden additions are allowed.
- Time limits apply for all three stages.

TOWER OF INNOVATION

Description :

Tower of Innovation is a creativity-based challenge built around Jenga blocks.
Each block may contain:

- A component name
- A constraint
- A task or challenge

Teams must pull blocks and use whatever component/constraint is written on them to build a prototype or concept model

Rules :

- Only Jenga blocks and materials provided by organizers may be used.
- Whatever component or constraint appears on the selected block **MUST** be used in the project or concept.
- If the tower collapses at any point, the team:
  Organizer team rebuild the tower
- Rough handling of blocks leads to disqualification.
- Time limit applies; no extra time will be provided.

DEBUG DETECTIVE

Description :

Debug Detective is a fast-paced, multi-level technical challenge designed to test problem-solving skills, digital proficiency

In Level 1: PC Hunt, teams race against the clock to decode a physical clue and locate the correct PC hidden among multiple systems in the lab. Only by identifying the right machine and verifying it can they advance.

Level 2: Digital Puzzle Mission shifts the challenge into the virtual world, where teams must crack complex puzzles involving ciphers, decoding, logical reasoning, and image reconstruction. Their speed and accuracy determine how far they move ahead.

Level 3: The Technical Challenge, puts participants' knowledge and creativity to the test as they craft and present a concise technical paper on a surprise topic—within a tight time limit.

Rules :

- No phones or external assistance.
- Follow time limits strictly.
- Any misconduct or system tampering leads to disqualification.
- No external help; no tampering with equipment.
- Judges' decisions are final.

VIRTUAL ARENA SHOWDOWN

Description :

Step into the world of virtual reality with Oculus VR headsets! Players can immerse themselves in a variety of games and experiences, enjoying cutting-edge technology that offers unparalleled interactivity and excitement. Each participant will have a designated time slot to explore the VR environment and make the most of this thrilling opportunity.

Rules :

- Participants must follow all safety instructions given by the staff.
- The VR headset must be worn and removed only with staff assistance.
- Keep a safe distance from surroundings while moving in VR.
- No running, jumping, or sudden movements to avoid accidents.
- Any damage to equipment due to misuse will lead to penalties or removal.

INTERACTIVE CONSOLE

Description :

Interactive Console is a fun gaming zone where participants can play various PS5 games for entertainment.
This is not a competitive tournament—the event is meant purely for enjoyment, relaxation, and a casual gaming experience.

Rules :

- Each participant will be given a fixed playtime slot to ensure fair access for everyone.
- Once your time is over, you must hand over the controller to the next participant.
- Handle all PS4 equipment with care.
- Rough handling, throwing controllers, or damaging equipment will lead to removal from the event.
- Any damage caused by misuse may result in compensation charges or penalties.
